

Figma File Structure for Rasuto App

Pages Setup

1. 🎨 Design System

- Color styles
- Typography styles
- Component library
- Icon set
- Logo variations

2. 📱 App Screens

- Splash & Onboarding
- Home & Feed
- Product Detail
- Search & Filters
- Wishlist & Alerts
- Settings & Profile

3. 🔄 User Flows

- Product tracking flow
- Alert setup flow
- Search and filter flow
- Onboarding flow

4. ✏️ Prototypes

- Interactive prototypes for mentor review
- Animation concepts
- Transitions between key screens

Key Frames to Create

Splash Screen (393x852pt - iPhone 15 Pro)

- Dark background (( #1E1E1E))

- Centered Rasuto logo
- Tagline: "Never miss the last one."
- Loading animation (diminishing stock bar)
- Status bar setup

Home Screen

- Tab bar navigation
- Featured "Low Stock" items section
- Recently Added products
- Quick Filters row
- "Add New Product" floating action button

Product Detail View

- Product image
- Title, price, retailer
- Stock indicator (prominent)
- Stock history graph (simple)
- Alert settings toggle
- Share & wishlist buttons

Search View

- Search bar with filter button
- Recent searches
- Category filtering chips
- Results in card layout with stock indicators

Alerts Dashboard

- Categorized alerts (Critical, Low, Watched)
- Toggle for notification types
- Clear visual hierarchy of urgency
- Quick actions (view, dismiss)

Components Artboard

- Button variants (primary, secondary, tertiary)
- Cards (product, alert, empty state)
- Stock indicators (different levels)
- Input fields
- Navigation elements
- Modal designs

Organization Tips

1. Use auto-layout for all components for responsive designs
2. Create component variants for different states (normal, pressed, disabled)
3. Use proper naming conventions (e.g., "Card/Product/Low-Stock")
4. Document color variables and typography styles
5. Add screen descriptions and annotations for mentor clarity
6. Include interaction notes for prototype
